1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-15 are allowed because the prior art of record fails to teach, disclose, or fairly suggest an improvement in a process for the wet oxidation of a waste stream containing carbon and nitrogen-containing pollutants comprising initially removing nitrogen-containing pollutants using a nitrate salt of an aliphatic amine or an aromatic amine as a denitrifying agent at a temperature of 180-300°C and a pressure sufficient to maintain liquid phase conditions, followed by removing carbon-containing pollutant by treatment with activated carbon, chemical oxidation, or biotreatment. It is submitted that U.S. Patent No. 5,641,413 to Momont et al. discloses a process for treating wastewaters containing carbonaceous and nitrogen-containing compounds using wet oxidation at a pressure sufficient to maintain a liquid water phase and at a temperature which includes temperatures recited in instant claim 1. However, the instant claims are not obvious over Momont et al., because Momont et al. do not suggest removing nitrogen-containing pollutants using a nitrate salt of an aliphatic amine or an aromatic amine as a denitrifying agent and then removing carbon-containing pollutant by treatment with activated carbon, chemical oxidation, or biotreatment. Rather, Momont et al. teaches the addition of inorganic nitrogen-containing compound to oxidized wastewater.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
